11. (Original) A machine-readable medium that provides instructions, which when executed by a machine cause the machine to perform operations comprising:

receiving a request for content;

determining content to be displayed based on a set of factors including a time and a location;

ranking the content based on a bid amount, the bid amount correlated to the time and the location; and

displaying the content in a rank pattern determined according to rank of the content.

- 12. (Original) The machine-readable medium of claim 11, wherein the content is a set of products.
- 13. (Original) The machine-readable medium of claim 11, wherein the content is a set of sellers.
- 14. (Original) The machine-readable medium of claim 11, wherein time is one of a date, hour of day, and day of week.
- 15. (Original) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising: determining an advertisement to be displayed based on the set of factors; and displaying the advertisement with the content.
- 16. (Original) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising, further comprising:

obtaining a bid from a client through a web based interface.

17. (Original) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising, further comprising:

displaying content that has a correlated location, the correlated location within a defined distance from a customer.

18. (Original) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising, further comprising:

displaying content that has a correlated location that is a geographic region which a customer is within.

- 19. (Original) The machine-readable medium of claim 11, wherein the displaying of the content is through one of a web appliance, computer system, wireless device and interactive television system.
- 20. (Original) The machine-readable medium of claim 19, wherein the interactive television system utilizes a simplified navigation system.
- 21. (Previously Presented) A method comprising:

 displaying a set of navigation options through an interactive television channel;

 ranking navigation options based on a one of merchant feedback and user feedback;

 and
 - 22. (Previously Presented) The method of claim 21, further comprising:

 determining a placement of a matrix layer of a navigation interface based on ranking.
 - 23. (New) The method of claim 1, further comprising: tracking user navigation for a pay by performance system.

arranging navigation options based on ranking.

- 24. (New) The method of claim 1, wherein ranking the content is part of a bid for placement system.
 - 25. (New) the method of claim 1, wherein the request for content is a key word search.
- 26. (New) The machine readable medium of claim 11, providing further instructions, which when executed by a machine cause the machine to perform operations comprising: tracking user navigation for a pay for performance system.

- 27. (New) The machine readable medium of claim 11, wherein ranking the content is part of a hide for placement system.
- 28. (New) The machine readable medium of claim 11, wherein the request for content is a key word search.
